#### YEARLING BULLS

Yearling bulls selling will not be semen tested prior to sale time December 1st, however they sell with a complete cash back guarantee and will be tested prior to delivery. Complimentary wintering and delivery is included on the yearling bulls until April 1st.

**TERMS:** Unless otherwise previously arranged with an individual consignor, terms of this sale are cash payable in Canadian funds at the prevailing rate of exchange on the day of sale. All cattle may be held until the selling agent is satisfied that suitable arrangements for payment are made.

**IN THE CASE OF ILLNESS,** a veterinarian will be called by the Sales Manager if deemed necessary, but any expense involved will be the responsibility of the CONSIGNOR until the animal is sold and the PURCHASER thereafter.

**AS SOON AS AN ANIMAL IS SOLD,** it becomes the responsibility of the purchaser.

**BIDS:** Every animal entering the sale ring will be sold to the highest bidder. There will be no by-bidding by the owner or anyone authorized by him, however, the owner will be permitted one protective bid.

**DISPUTES:** In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

**ANNOUNCEMENTS:** Errors discovered in the catalogue will be corrected by announcements from the Auction Stand at sale time, and such corrections will take precedence over the printed matter in the catalogue.

**CERTIFICATE OF REGISTRY:** A Canadian certificate of registry duly transferred will be furnished to the buyer for each animal after settlement is made.

**ACCIDENTS:** Although every precaution will be taken to protect the safety and comfort of the buyers, neither the Auction Market, the Sales Manager, nor any owner assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

**LIABILITY:** Kueber Farms and Viking Auction Mart are acting as agents only and assume no responsibility for representations made by the seller. Purchasers must look to the seller for fulfillment of all guarantees and representations made by the seller.

**BREEDERS GUARANTEE:** The terms standard with the Canadian Angus Association shall apply. Beyond that: (a) All animals sold are guaranteed breeders. (b) All bred females have been declared safe in calf by a qualified veterinarian. Pregnant females are guaranteed pregnant a minimum of ninety (90) days. (c) All mature females raised a calf in this year. (d) All calendar year heifers are guaranteed open at time of sale. Any animal that has not proven itself a breeder within six months after the date of sale, if, in healthy condition, may be returned to seller at buyer's expense. The seller reserves the privilege of trying for a period of six months to prove the animal a breeder. The seller, at his option, may either return the purchase price to the buyer or replace the animal with another of equal value in full settlement and satisfaction of ALL claims. Any complaints regarding fertility of any animal in this sale shall be directed to the Contributor. All complaints regarding breeding difficulties must be reported in writing by the buyer to the seller within the time specified above and any animal returned must be free from disease and in good health. Any calendar year heifer calf shown and/or flushed by the purchaser is no longer guaranteed a breeder

**INSURANCE:** Livestock insurance and/or transit insurance will be available.

**TESTING:** All cattle will be held at sellers' expense until all necessary health requirements are met.

# WELCOME FROM KUEBER *Farms*

It is with mixed emotions I sit here to write the welcoming remarks for our Complete Angus Dispersal that will take place December 1st in Viking, AB. For the past 23 years we have been quietly breeding Angus cattle at our farm south of Killam and hold great passion for the Angus breed, cattle industry, and the way of life which comes with the business.

Due to minor health issues and lack of human resource capacity at this time- we've made the difficult decision to offer the entirety of our esteemed Angus herd at public auction.

Though the thought of dispersing over two decades of intensive and selective breeding is daunting- the production of this catalogue and preparation for this sale has been a very rewarding experience. To sequence this catalogue- placing on paper- the way each cow family and breeding piece fits together, has produced, and the way they are positioned to propagate- leaves one feeling incredibly optimistic about the breed and the impact these genetics will go on to have.

From the very early years our mission has been heritability, productivity, and phenotype. We have never been 'EPD people' and we never will be 'EPD people'. We believe the individual in the flesh should come first. The individual should be supported by actual performance numbers and data (not speculative). Their production should be consistent and the heritability of their genetics evident in their progeny every year. In terms of phenotype, we strive for sound structured cattle from the ground up. With the direction heavily EPD focused programs appear to be driving phenotype, we've paid special attention to selecting correct hindlegs, square tail heads, nice heartgirths, natural thickness, and typey angus heads. In recent years we've been studying the bonoma principles and the correlation between phenotype and traits such as fertility. In addition to production, we believe phenotype, structure, and fertility is longevity; thus it is seldom we put up with an ugly cow.

Throughout the elaborate footnotes you will see qualitative information provided in the form of our logic or reasoning for genetics selection whether it be an AI sire, walking herd sire, or the next cornerstone female. It is our goal annually to acquire as much qualitative information about these genetics as possible to complement the actual data. In almost all cases, we made an effort to see the genetics behind all of these bulls or in some cases, sire groups from these genetics.

We are located in Central Alberta where we have some of the best chernozemic soils. Grain land is predominant and pasture land is a scarcity. Our land base has kept the herd small and enforced strict culling.

From a human resources standpoint, it was more efficient for us to set up a large number of recipients at one time so we could attain the most AI matings while having a narrower calving interval. There have been some pretty solid cows in this offering that were set up and used as recipients- to no fault of their own. If you find yourself on the Angus Database and notice a female in this sale is missing a calf or has a 'glitch' in her performance record- it is most probable she was used as a recipient and successfully carried and raised a calf that year (or many years) which isn't reflected on the database. I'd be happy to verify these cases on an individual basis for the discerning buyer.

In August we were fortunate to host the Northern Alberta Angus Club tour where we very much enjoyed hosting nearly 100 fellow cattle enthusiasts to our farm- thanks to the Northern Alberta Angus Club and OBI Livestock for coordinating this venture. The comradery continued on tours throughout early and mid fall and we were humbled by the comments "hidden gem", "I wish we'd stopped by sooner" and "even better than her picture". Regrettably, this lead us to the conclusion we didn't do as much marketing and promotion over the years as we should have to give this program the prominence it deserves.

Endless thanks go to various mentors we've had the last 23 years. In my teens I was fortunate to partner with the Schneider's at Northline Angus where I gained exposure to some of the top shows across the continent including NWSS, NILE, Farmfair, etc where we displayed and showed partnership genetics. It was an invaluable experience being involved in the process to prepare cattle for this level of exhibition. It also provided the opportunity to evaluate contemporary genetics on both sides of the border and network with breeders and industry professionals. Just down the road- the Gibbs of the historic Skillymarno Angus were influential in steering us towards the breed. Locally, Fred & Carol Wilson also remained very supportive and encouraging to us and without the land we were able to utilize- we would not have been able to grow to the extent we did.

Fellow breeders Steven Lang & family- it was a pleasure hosting our annual bull sale with you every year in Viking and we will miss this endeavor. There are several other countless breeders, sales management teams, and industry professionals who have become not just business partners, but friends. We will continue to hold great respect and value for these relationships we were able to foster and look forward to keeping in touch.

In closing, it is an honour and surreal to have been named 2023 Alberta Angus Association Breeder of the Year on this very special year for us. The greatest result from this sale is going to be witnessing where these cows go and the impact they will undoubtedly have. With a little more marketing and a little more managing than what we did- one could sure reap the rewards of these productive and heritable genetics.

*Ty Kueber*  
On behalf of the Kueber family

Observed bred May 1 Jaymarandy The The Lion 125J. Ultrasounded 30 days June 1.

Soo Line Rose 1019, Dam of Lot 1

LD Capitalist 316- Sire to lot 1

After seeing the impressive Rose 1019 in Radville, SK- I new one day we needed to acquire a 'Rose' of our own. Our early attempts at acquiring her son, Brooking Real Estate 6072 were not fruitful though our luck seemed to have taken a turn for the better when an exclusive semen package was offered through the historic Motive Event. We flushed our top cows at the time; Rosebud 32Y and Whiskeygirl 592A to Real Estate which proved very successful resulting in a number of bull sale highlights, and numerous stunning females - 5 of which are in this very sale. Though we were impressed with the job 6072 had done- I still wanted a Rose of our own to propagate the matriarch we were growing increasingly fond of. In the fall of 2020 we acquired Rose 9250G from Rusts in ND. At the time she did not fit our calving program- but nonetheless we were captivated by her phenotype, design, and structure- mated back to the exciting Rainmaker son, Ellingson Acquirer. Late spring 2021 she calved a beautiful heifer calf to Ellingson Acquirer which transitioned into a phenotypically stunning, docile and productive two year old (LOT 2). In 2021 we did not have intentions of dispersing and ideally wanted to run with this 'Rose' line and as a result, we flushed her quite early on in her career which was one of the best breeding decisions we've made to date. Her progeny on offer today are by 4 varying sires proving her maternal potency and heritability as a breeding piece. Rose has not just proven herself as a phenotypic standout with impeccable udder structure, foot quality, capacity and productivity- but as a cow that replicates these qualities into various service sires. All of her progeny to date are in this sale and both bull and heifer calves on offer have big time herd-bull and future donor potential. Her natural bull calf at side by GameNight is a sight to behold possessing much muscle shape and stoutness combined with correct structure and what appears to be excellent scrotal shape and size. Her ETs by Trust possess a lot of growth and capacity that is unique for how nice structured all of these progeny remain. Many people have toured and suggested this matriarch is "even better than her picture". The influence of Rose is world renown as evident by the elite offering put together for the Rose Bowl sale in addition to the contemporary breeding bulls Brooking National, Brooking Major, Brooking Real Estate, and a multitude of donor quality females. December 1, 2023 is an opportunity to continue your own "Rose" legacy and tie to a big time donor who is proven at replicating her quality.

**Coleman Glacier 031**  
\$270,000 1/4 interest Sire of pregnancies Lot 1E - 1H

**Rust Ms Rose 9250G**  
Dam to pregnancies selling as lot 1E-1H.

Coleman Glacier 041 offers an outstanding genetic and visual package representing everything we look for in an ideal Angus bull. His herd bull look and presence, along with his pedigree, is exactly what the industry is looking for. He has explosive growth with exceptional weaning and yearling numbers compiled with his maternal genetics that rank him highly in the breed for \$M. He was the featured Lot 1 bull of the 2022 Coleman Angus Spring Bull Sale where 25% of this outstanding individual sold for \$270,000 and he blends the best of the Rito 707 lineage. Glacier stems from a very productive Pathfinder dam, Coleman Donna 439, who has powerful dimension and structure with an exquisite look in a very maternal package. His dam is a full sister to Coleman Playmaker 427, a member of the GENEX Beef AI stud, and is a headlining donor in the program; she is a great herd sire producer with 11 sons that sold in our 2022 spring bull sale and is also the mother of Coleman Ace 989. Rose 9250G has replicated herself on every mating to date... just imagine the combination of Coleman Glacier 041 and the great Rose 9250G. It should be noted these recipients are registered angus cows and will sell with registration papers.

Fay 135E is a personal favourite and one of the deepest, stoutest, most capacious cows. Her completeness is unrivalled with her "10/10", "perfect" udder composition, square, good quality feet and broody design. Fay remains angular and feminine and travels exceptionally free & sound considering her belly basically drags on the ground. OCC Legacy 839L is time tested, proven, and world renowned for the quality of females he produces. Legacy 839L is still relevant today with semen commanding over \$700/straw in recent sales. I dare to say Fay 135E is an improvement on her lineage offering maternal potency and prowess from Legacy 839L and the dimension, capacity, hair, and soft middle contributed by the many times champion Jens Fay 135A. Fay 135E has a proven ability to produce the "good ones" and consistently replicate her quality as evident by her son at side by Trust 86G and her phenotypic standout bred heifer, Fay 135K. Her service sire, Trust 86G is a son of Ellingson Rough Rider- one of the most consistent and complete sire groups we saw in 2020-2021.

AI'd Bar-H Mindbender April 10, 2023 (safe). Exposed Kueber Definition 50K April 15- July 15, 2023. Ultrasounded 50 days on June 1.

A direct daughter of the stunning sale feature and donor Fay 135E. Firebrand 24H certainly stamped the heifer and bull pen the last couple years and like any true herd bull, his testament is that he's out produced himself multiple times in these crops. On this particular mating, Firebrand 24H notably added neck extension, length of spine, and maternal potency backed by the Resource daughter Donna 6205. Here is a yearling destined to replicate her dams production- and dare i say - potentially enhancing upon her at this stage of her development. The complimentary mating to Mindbender 141D introduces a unique pedigree incorporating S Summit and Tibbie 93U.

Fay 9L is a beautifully constructed daughter of Fay 4E who is a full sister to Fay 135E, and grand dam to Fay 4J. 4E was unfortunately injured this summer and was not able to be catalogued for this sale. Dam 4E, exhibits the same traits as Fay 135E in terms of udder quality, depth of body and capacity contributed by Legacy 839L. 4E is slightly larger framed and longer necked than her full sister but as indicated by her progeny and great progeny here (LOT 6)- produces the same angular angus types that are so attractive on the side profile. Fay 9L is by the complete, robust, Renown son Rocco. Rocco is backed by one of Canadas greatest donors, Erica 74A adds Natural Law to the equation in addition to the maternal potency from Erica 74A herself and the multitude of AI sires she has on the market. Renown bloodlines have been extremely sought after for a number of years and we decided to incorporate them through the use of Blaris Rocco 268F and Coleman Glacier 041.

The Fay family delivers another phenotypic standout in Fay 4J proving their ability as a family to consistently replicate their quality, performance, and phenotype. Sired by one of the most sought after bulls in recent memory, McCumber Tribute, Fay 4J is flawlessly designed with her beautiful lines, feminine head/neck and her 10/10 udder in terms of teat size, placement, balanced quarters and attachments. Even more exciting is her potential as a big time producer especially when you analyze the stout, performance oriented heifer calf at side by Ellingson Profound. Her dam, Fay 4G was our lead off cow in our 2022 herd reduction sale and is now working for Greg Sales in ON. Fay 4J offers immense donor potential not just evident by her phenotype and production, but also her fresh, contemporary pedigree offering mating flexibility to some of today's top bloodlines. The Fays never disappoint and their consistency is undeniable. This sale is an opportunity to acquire 6 decedents from this potent and productive cow family.

MWC Rosebud 32Y Dam to Lot 7

Kueber Rosebud 32H (Flushmate)  
 Selected by Gracedale Angus

Our Rosebud cow family descends from MWC Rosebud 32Y who was purchased as a fall born calf through the MWC Investments Dispersal and notably comes from Rosebud 115F who was Premier Dam at the World Angus Forum in 2009. Rosebud 32Y was our initial cornerstone female which we decided to build around for great reason due to the consistency she has demonstrated in her 11+ years at our place. Her daughters all have demonstrated that same big bodied, deep ribbed, nice made, correct phenotype which the Rosebuds are known for. Not only are the Rosebuds around here nice to look at- annually they wean 80%+ of their bodyweight and are the true epitome of productive cows. The 'Rosebuds' have become an annual staple offering for us always ranking at the top of OBIs "must have" list and our offerings have traded to reputable herds over the years; MWC Investments, Everblack Angus, Rockytop Cattle, Gracedale Angus, Elliot Brothers etc. Sons are always a feature group in our bull sale and are well received in their own right. There are 6 daughters of the great 32Y on offer here today and they are lead by Rosebud 4H. Rosebud 4H in particular has been a standout since birth; square made, big topped, wide cow with excellent bone, foot structure, and skeletal design. Especially unique is how Rosebud 4H carries so much internal dimension, skeletal width and capacity, yet remains relatively up-headed and clean through her chestfloor. Flushmates (pictured) have been well received and offer great utility to the commercial producer blending calving ease, maternal merits and structural correctness with weaning and yearling performance in practical and durable frame sizes. Rosebud 4H replicated her stout made, capacious, correct phenotype on 3 different matings proving the heritability of this Rosebud line. Her natural calf at side, Lebron 75L is captivating with his muscle pattern, style and dimension. The ET progeny here by the \$78,000 HF Showtime 78H reinforce that small headed, flat shouldered angus look that seamlessly blends back into a soft, deep belly, square hip and stout hindleg. The Rosebud family has proven to be a cow family time tested and proven-responsible for the foundation of many of the top angus herds today; Crescent Creek, U2 Ranch, and MWC investments amongst others. Rosebud 4H is an extremely complete, strong, robust cow destined to contribute to the history of this already storied cow family.

Flushmates from the \$78,000 HF Showtime 78H. When we viewed Showtime 78H at Hamiltons in the spring of 2021 we were immediately captivated by the way this bull blended correct angus phenotype and wide-based structure with big time curve bending performance at weaning and yearling. To us, he was a 'no holes' bull offering 41.5cm yearling scrotal, 1600+ lb sale WT, calving ease, and backed by the beautiful udded Big Sky daughter HF Echo 86D. Paired with Rosebud 4H who is backed by Hi Def and Rosebud 32Y- one should expect the best of phenotype, production and heritability from these flushmates.

AI'd Rust Forged of Fire on April 8, 2023 (safe). Exposed Jaymarandy The Lion May 1-July 1, 2023. Ultrasounded 50 days on June 1.

Rosebud 6H - an extremely productive, young, direct daughter of Rosebud 32Y and flushmate to 'up and coming' donor Rosebud 4H, and herdsires Hi Definition 53H & 58H. Rosebud 6H has produced the exceptional walking sire Definition 50K along with her Ellingson Profound calf at side who is an absolute standout blending moderate BW, phenotype, foot quality and performance backed by a cow family known for producing them year in and year out. Her mating to the champion Firebrand son, Forged of Fire is an exciting one which adds the incredible breeding bull and phenotype progenitor Firebrand with the Natural Law- backed Beauty 8187. Here is a standout cow that is 2/2 in her production of big-time herd bull prospects. Rosebud 6H could very well be the next matriarch to carry forward the storied Rosebud line.

50K has been a standout since birth - often spotted across the pen for his stout 'brick' - like stature. Originally, his beautiful dam Rosebud 6H calved within her AI interval to Ellingson Profound and subsequently we kept him back for use as a clean up sire. We thought he offered a unique twist to the Rosebud legacy adding S Powerpoint lineage which was proving popular and useful south of the border. As it turned out, DNA came back on him and he was sired by our leading bull in 2021, Hi Definition 53H who sold to Lyseng Land & Cattle for use in their elite SimAngus program. Although Definition 50K offers more line breeding than we typically plan for, if you listen to podcasts or interviews from great cattlemen such as Tim Oldhe (OCC) or quiz Barry Young (Youngdale), its use as a tool to enhance consistency and heritability is a proven and tested method- just take a look at the Youngdale bull pen every spring. Definition 50K is testament to that philosophy and in his own right is a bull that demonstrates immense herdbull potential with his massive quarter and

wide pinset. Definition 50K is exactly what we envisioned when incorporating the Youngdale Hi Definition 185B bloodlines after viewing the Youngdale bull pen a number of springs ago. "Hi Def" 185B in our eyes could remain a contemporary 'go-to' option for good footed, big scrotalled, growthy, thick made, type of cattle. Uniquely, Definition 50K came as a calving ease prospect and quickly developed that sought after muscle pattern that is expressive through his stifle and lower quarter. 50K is a true real-world curve bender- unique in the way he combines his stout and expressive muscle pattern and structural correctness on his wide based set of feet & legs. 50K is as docile as you can make one and his dam has been a stellar producing cow as you can see by her two big-time herdsire prospects on offer today. We didn't quite get the picture of Definition 50K that we intended to due to his heavy use this summer, so be sure to see him in the flesh or on CattleVids. 50K is exceptionally complete from the ground up, and his services selling not only add value, but offer a unique opportunity to jump on two elite breeding pieces stacked together; Hi Definition 185B and the Rosebud's.

Rust Forged of Fire – service sire to lot 11

MWC Rosebud 32Y dam to lot 11

Kueber Braveheart 52H - sold to Chuck Bullee, 2021 Bull sale

A direct daughter of Connelly Thunder 587- who is known for transmitting his true curve bending (low birth high growth spread) traits and yet remains a classic and timeless sire with semen extremely sought after in the Sire Buyer classifieds. Rosebud 132B in her own right is the first daughter of fall born MWC Rosebud 32Y- a cornerstone cow who was acquired for us by Bob Toner and Rob Holowaychuk through the MWC Investments dispersal. The Rosebuds have been big-time, heavy hitting females for us and Rosebud 132B contributes to that legacy through her production of our 2019 high-selling bull Tebow 77F in addition to two beautiful females sired by Trust offered here; 132K in the bred section and the extremely stout, deep sided 132L at side. Rosebud 132B offers exceptional foot quality and an unmatched maternal, broody look with good udder quality and a fertile performance record. She sells with the early complimentary service to Forged of Fire who blends the consistent progenitor Firebrand and Beauty 8187 adding Natural Law and Beauty 333 to the equation.

Exposed Jaymarandy The Lion 125J May 1 - July 1, 2023.

MWC Rosebud 32Y dam to lot 13

Brooking Real Estate 6072 Sire to Lot 13

Kueber Real Estate 58G flushmate to lots

An absolutely stunning daughter of Real Estate 6072 and Rosebud 32Y. Rosebud 13G is possibly the 'Rosebud' of the group who most closely replicates her dam 32Y, except is perhaps even more attractive through her front third offering a more extended and erect head and neck. Her first calf Rosebud 13J by McCumber Tribute caught the astute eye of Grayden Kay, and was selected out of the pen private treaty. Her first son, Firebrand 89K patterns her closely in terms of design saw brief exposure to some of our later calving cows. In 2022, 13G cycled at the wrong place at the wrong time and due to our limited human resources at breeding season was implanted a week later with the rest of the recips to increase the number of AI matings. She calved this spring with the feature Rosebud 113L calf- which is the sole reason she does not show as raising a calf in 2023 on the CAA registry. Rosebud 13G is a bigtime female built for the long haul- bred back to The Lion which adds G-Man and the consistent Youngdale Grace cow family to the next generation.

A calving ease two year old off the stunning Rosebud 13G cow. We kept him back to do some late summer walking on our spring calving group. Everblack Firebrand 24H bred exceptionally well for us; see the large offering of bred heifers in this sale by him. Donna x Rosebud combination should be sure to leave striking, beautiful phenotype females that are structurally correct.

AI'd SAV Sterling on April 13, 2023 (safe). Exposed Jaymarandy The Lion 125J May 1 - July 1, 2023. Ultrasounded 50 days June 1.

Rosebud 10G is the deepest sided Rosebud on offer. Her first son, Prolific 68J by Profound was an phenotypic standout rocking a low birthweight and stellar performance throughout that summer. He was slated to be a walking herd bull for us in 2021 and he was lost post weaning in a freak accident. Son Believe 56K was one of the heaviest bulls in the pen last fall and replicated his dams same stature, base width and internal dimension. 10G is a beautiful uddered young cow, whose full sister 12G is working at Everblack Angus and was responsible for some of their top selling bulls and heifer calves in recent sales. Rosebud 10G sells bred early to SAV Sterling- the biggest scrotalled son of Sitz Stellar that we could find.

MWC Rosebud 32Y dam to pregnancies and Embryo lots 15A-D

Kueber Rosebud 13G maternal sibling to embryo lots 15 A-D

We had one straw of Coleman Glacier 041 left after we flushed Rosebud 32Y to him the first time and we decided to use it again on a split flush with Mindbender 141D on the great Rosebud 32Y. Either way, the resulting pregnancies will offer unmatched maternal reinforcement adding either Donna 439 or Tibbie 93U to the maternal tabulation. Glacier 041 is one of the hottest bulls on the market right now and needs no introduction. Mindbender was selected by Brian McCarthy of Spring Creek Simmentals so if you are unfamiliar with the bull- you can rest assured he possesses enough performance to replicate both sexes well in a performance oriented angus and sim angus program.

Exposed Jaymarandy The Lion 125J May 1- July 1, 2023. Ultrasounded 45 days on June 1.

by Hi Definition 58H offered here today. Annie K 18G previously produced Kueber Trust 55J (by PDAR Trust 86G - see candid) who was possibly the best calf we've ever raised in terms of capacity intersecting correctness and phenotype. Unfortunately like a lot of the good ones- he was lost too early. His full sibs here by Trust are tanky, stout, hairy replicas of 18G herself and are sure to command some attention on sale day. Our 'original' Geis Annie K 81Z was acquired through the historic Geis dispersal where her feature Kodiak dam traded to Forsyth ranch and her stand-out maternal brother, Geis Blackman 1160'11 to Langco Land & Cattle where he made a lasting impact as a foundation herdsire. The heritability and genetic transmittance of the Annie K cow line is evident in the way this donor has replicated the same traits on her progeny in this book from four different sires. The Annie K cows are well received across the nation likely due to their ability to replicate both sexes whilst working in various environments and management regimes. Here is a unmatched opportunity to get in on the ground floor of a legacy that is still being written.

Exposed Kueber Definition 50K April 15- July 15, 2023. Observed May 9.

Annie K 118J is an exceptional daughter of Annie K 18G who replicates the same alert, attentive profile, soft middle, and angularity through her front third. Her sire, McCumber Tribute has been a hott commodity the last few year with semen topping several sales likely due to the 'word on the street' in regards to Tribute daughters in production. Even more exciting is the fact Annie K 118J improves upon her phenomenal dam in terms of having a more refined, smooth, well blended foreudder attachment and four balanced quarters. Admittedly, we lost her calf this spring due to human error. Her mating back to Definition 50K for 2024 is an exciting and complimentary combination.

McCumber Tribute sire of lot 19

An efficient, nicely constructed TC Freedom daughter out of the Geis Annie K 81Z. Her 2021 calf by McCumber Tribute was our lead-off that year and traded to the renowned Reich herd at Bashaw. Her 2022 bull calf by Firebrand replicated his same square hipped, stout, balanced design. Her fancy, extended & alert (but docile) heifer calf at side by Firebrand 24H doubles up on Annie K in the pedigree and adds Coleman Donna 6205 (Resource) to the equation.

AI'd SAV Sterling on April 16, 2023. Exposed Jaymarandy The Lion 125J. Ultrasounded 45 days on June 1

The Whiskeygirl cow family is one we created from our standout HF Tiger 5T daughter, Whiskeygirl 592A (selling as Lot 25). However, we decided to lead this section with 3 flushmate daughters in the prime of their production- highlighting the consistency in quality this family is known to propagate. Whiskeygirl 592A is a stunning, hairy, good footed, wedge shaped cow extremely reminiscent of her grand dam, HF Echo 84R- the dam to world renown herd sires HF Tiger 5T and El Tigre 28U. Her first flush was to Brooking Real Estate 6072 and she knocked it out of the park when you analyze the three flushmates on offer today and subsequently what they've went on to produce. The trio are 'perfect uddered', capacious & dimensional- standing on a solid set of feet and legs. Whiskeygirl 5G is a wedge shaped, attractive, attentive, model angus cow who once again produced a stunning Rocco 268F heifer calf at side. AI'd back to the Sitz Stellar son, Sterling- ROI looks promising on this donor candidate.

Exposed Jaymarandy The Lion 125J April 23-July 1, 2023.

An up-headed, feminine fronted, big, long-bodied hairy cow beautifully constructed in her lines. Her daughter 112K is an exceptionally well made daughter of Everblack Firebrand 24H who is sure to be found in the heifer pen due to her captivating phenotype, wide pin set and expressive lower quarter.

The Original Whiskeygirl bred back The Lion 125J. 592A's first son X-Factor 28C was selected by Kevin Baird as a lead off bull from our 2017 Annual bull sale, Steeler 59E selected by Lyseng Land & Cattle as lead off from our 2018 bull sale, son Real Estate 60G selected as lead off in 2020 now working at MJT, and Natural Law 72H from the 2021 sale working at Elliot Brothers. By now you can see what this family has produced and her ability to replicate. Docile, sound, youthful-looking, and productive.

Blackcap Essence 16B is a full sister to the multiple champion and supreme champion female DMM Blackcap Essence 7Y. Though more moderate than her sister in terms of stoutness and capacity, 16B has been stellar in production with 17 calves registered with CAA and all 6 bull calves going through our annual bull sale. Notable offspring include her first son, Prowler 52D working at Lyseng Land & Cattle, No Zeke 64E working for Derek These and Gunsmoke 59G working at Ollenberger Stock Farm. Throughout her time here on the farm, Blackcap Essence 16B has continually replicated her long spined, attractive phenotype. Her daughters are noted for being angular, hairy and big hiped. They exhibit excellent udders in terms of composition and milking ability. Her daughters in this sale are lead by 12J- an exceptional female by Profound. Her photo (12J) was taken this summer so be sure to check out this female in the flesh on sale day. 16B's calf at side this year, Ledger 50L is an absolute unit! - a massive, rugged son of Peak Dot Trust 86G- sure to be a sale highlight. Our full intention was to repeat the mating at side and breed her back to Trust 86G, however she cycled back quick while waiting for the shipment and thus sells bred early to the 'original' and timeless Kodiak 5R.

Exposed Jaymarandy The Lion 125J April 23-July 1, 2023.

2F is a phenotypically stunning female by unique and outcross sire Baldrige Command C036 and from the Miss Burgess line acquired through the Glesbar Dispersal. Her grand dam, 87Y was one of the phenotypic stand-outs that day and has been an extremely consistent producer raising 11 calves and still remains in the winter calving program. 2F is an extremely balanced, wedge shaped individual with sweeping rib, good foot structure and perfect udder composition. 2F's first daughter was my personal pick and featured in our 2022 reduction sale selling to Glenrose Angus. Her 2023 heifer calf at side and her 2022 yearling in the bred heifer pen replicate her same square hip, stout hindleg, and angularity. 2F is a unique opportunity to acquire a genetic twist on one of the very original cow families imported from Scotland, the Miss Burgess'.

The Dark Duchess cow family originated through the initial purchase of Dark Duchess 268Y a wedge shaped, feminine Bar-E-L Wisecrack daughter from the great Trefiak herd at Edgerton. Through her production we acquired the stunning Dark Duckess 268B (lot 37), dam to Dark Duchess 368E. 368E is a beautiful, easy doing, tanky cow demonstrating excellent production as evident by her calves in this sale; Dark Duchess 368K (by Firebrand) and 368L (by Rocco). Dark Duchess 368K closely replicates her dam in terms of being a wedge shaped, angular fronted female who blends back into a robust rib cage, vast pelvis dimension and a wide pin set. Here is an unparalleled opportunity to continue this elite cow family around this capacious, belly dragging mother-daughter combo- Dark Duchess 368E & 368K.

AI'd Blairs Rocco 268F on April 16, 2023 (safe). Exposed Jaymarandy The Lion 125J May 1 - July 1, 2023. Ultrasounded 50 Days on June 1

The Erelite family was acquired from one of Canada's largest seedstock producers; LLB Angus. Our original purchase LLB Erelite 240A has been an exceptional cow producing 9 calves, many being bull sale and bull congress display string highlights (X-Factor 2C, Raider 57E) and still maintains a winter calving interval. 240A is a long lined, strong hearted, deep sided, nice footed female who combines one of our favourite "straight Canadian" sire lines- Blackman and the phenomenal cow and phenotype transmitter, Hot Rod. 240G patterns her dam in terms of her side profile but adds the hair, stoutness and udder quality of our past walking sire Shotgun Willie 54E. Like a few other quality cows in this offering; 240G was implanted in 2020 and successfully calved in 2021 which isn't accurately reflected on the registry. Her calf at side, Erelite 240L is a prime example of this cow families ability to replicate their quality. She is a beautifully designed calf with an expressive head and neck that ties nicely into her flat, smooth shoulder blending back into a sweeping rib cage and wide pelvis. The calf at side, Erelite 240L is a unique pedigree combining Hi Def and Rosebud with Shotgun Willie and Blackman/Hot Rod- a truly unique and generational testament to the diversity and depth of our program. 240G sells bred back early to the exciting and complimentary mating to Blair's Rocco 268F.

40

South of the border, the Dixie Erica tribe is prevalent in some of the top seedstock herds across the nation including but not limited to Coleman Angus, Duff Cattle Co, Oldhe Cattle Co etc. Dixie Erica 32A was acquired through the historic U2 Dispersal in 2019. Prior to our ownership she was a herd bull factory for the Ungers notably producing the \$26,000 U2 Collision 156E who sold through their annual bull sale. Upon her arrival, she produced an extremely stout and capacious heifer calf, Kueber Dixie Erica 704H by Trendspotter (pictured) who was eventually selected by the team at BMS for the prestigious Rosebowl sale and traded to LLB Angus. Dixie Erica 32A is a production factory as evident by her production in this sale and her prior role at U2. Here is a hard milking, nice uddered, deep bodied cow with an attractive profile and a consistent production record. Her daughter 704J lot 41 is 'out of this world' in terms of quality and donor potential. Her mating to The Lion 125J adds Grace 640D and her legacy of producing herd sires.

Dixie Erica 704J is an extremely thick, wide, deep, performance oriented female being sired by DMM Maximus 18G and backed by her beautiful, proven, First Impression dam Dixie Erica 32A. Maximus certainly replicated his good hair, extreme capacity and dimension. Dixie Erica 704J is a massive two year old that maintained her condition easily while boasting a picture perfect udder reminiscent of her paternal grand dam, Miss Essence 5C. If number are your thing, Dixie Erica 704J posts a WW +70; YW +112. Her calf at side is a nicely constructed Impressive 53J daughter who adds Blackcap Essence 7Y, Rosebud 32Y and MAF First Impression to the already existing star studded pedigree. Dixie Erica 704J sells bred early to Blairs Rocco 268F which adds the immortal Erica 74A and Renown to the equation. Here is a potential donor that is a massive power female with refined udder quality and big time show ring potential.

AI'd SAV Sterling on April 10, 2023 (safe). Exposed Kueber Definition 50K April 15- July 15, 2023. Ultrasounded 50 days on June 1

HF Tibbie 93U Dam to lot 42

We are always looking to add new cow families to use back on our black arsenal of Rosebud, Rose, Fay, Annie K, Whiskeygirl etc. and the next logical move- in true angus tradition- is to add a Tibbie! She is not just any Tibbie though... she is a HF Tibbie 93U. Tibbie 93U has been a mainstay in the Bar-H program and most notably rose to fame through her production of Bar H Crossfire 63A acquired by Hamilton and Six Mile, and the \$38,000 1/2 interset Mindbender 141D, and grand dam of the \$90,000 Bar H Sensation 22J. Everything about Tibbie 5K is dimensional from her hip, top, and barrel to her wide muzzle and ears. Tibbie 5K appears to replicate the udder quality, performance, and broody look of her famed Predominant dam- who we elected to include further via the AI matings to Mindbender in this sale. 5K holds immense donor potential, and her early service to SAV Sterling (the biggest scrotalled son of Sitz Stellar on the market) is another unique mating intended to enhance ROI for the new owner.

Exposed Kueber Definition 50K April 15 - August 15, 2023

8K & 11K are the result of a successful embryo package purchased from Canadian Donors. These two flushmates are off the potent donor, Ms Instinct 0065. 0065 is a typical type of female you would expect to see from her dominant OCC/Duff lineage; moderate in frame with tremendous internal dimension, width of chestfloor and ideal udder composition. Sire, W B Pendleton was the talk of 2019 when he claimed Grand Champion angus bull at NWSS and was acquired by top seedstock producers Express Ranches, PVF & Hoffman south of the border. 8K and 11K are deep sided, big ribbed, tanky yearlings that exhibit great teat placement and appear to be developing a nice udder. Both these females carry the value added service to Definition 50K- sure to reinforce the thick made, deep bodied, stout design that is sought after. Definition 50K is extremely nice-made for how much dimension and capacity he has with added foot quality in terms of claw shape and heel depth. Definition 50K also adds the maternal potency, heritability and consistency highlighted by our largest cow family offering in this sale; the Rosebuds.

Al'd Rust Forged of Fire on April 16, 2023 (safe). Exposed Jaymarandy The Lion May 1-July 1, 2023. Ultrasounded 40 days on June 1.

The Lady Blossom cow family originated with the purchase of Norsemen Lady Blossom 3R out of the Mobo dispersal in Ft. Assiniboine. Times were tough back then in the cattle industry and Lady Blossom 3R stood out that day not just in terms of her udder quality and structural correctness but due to her easy fleshing nature and stout design- not to mention her massive Kodiak calf at side. 3R was the first cow we flushed who gave rise to several herdsires that we used in our purebred program which include Kueber Manning 30C for Hahn Cattle Co, Kueber Snapchat 64D for Double Q Angus, Kueber Double Duty 12C for Clegg Angus, Kueber Willis 10C for Justin McMillan and Kueber Tebow 10C who we used heavily. 15H is an extremely stout, moderate framed, nice uddered 3 year old sired by the Kodiak 5R x Lady Blossom 3R son, Willis 6C who we kept and drew semen on. 15L, the calf at side of 15H should not be overlooked as she is correctly constructed and offers a feminine, maternal profile in a stout made, wide-topped package. Lady Blossom 15H sells bred early to the value added service to Forged in Fire who adds not only Firebrand, but Beauty 8187 to the equation. 8187 is a stunning donor and rightfully earned lot 1 spot in this years prominent Brooking Open Book Invitational sale.

Exposed Kueber Definition 50K April 15 - August 15, 2023

An extremely unique breeding piece that has the look, the pedigree and the service to make an impact. Lady Blossom 101K- one of the first Freys Cowboy Logic daughters to sell in Canada out of a Baldridge Command C036 Daughter. Just have a look at what Command 036 makes for daughters in the stunning Lady Burgess 2F (LOT 32). We selected Cowboy Logic a couple years back based on his production as a herd bull for Freys as evident by their standout string of stout bulls at the OKC Cattleman's Congress. Here is a curve bending (low BW high YW) pedigree that possesses performance based genetics to turn into a producing machine. The mating to Definition 50K could be the golden ticket adding the consistency of Hi Definition and the Rosebud cow family with his stout and expressive muscle pattern and solid set of feet & legs.

Exposed Jaymarandy The Lion 125J May 1st - July 1st. Exposed Kueber Hi Definition 58H - July 5 - August 15, 2023.

The Erica cows originated from Fischer Angus and Quarter horses and were acquired back in the mid 2000's. Erica's are known for their milking ability and weaning performance. The eldest of the tribe lots 52 and 54 are full sisters by Daines Heavy Si 57Z who replicated his long spined, up headed, attractive profiling style, and good hair into these daughters. 114B has a massively dimensional and stout calf by Trust 86G at side and is likely to follow in her dams footsteps carrying forward performance genetics and udder quality.

214C is a full sister to 114B and is perhaps even more feminine and angular than her- if that's even possible. Her calf at side, Lazzaro 72L is a stout, rugged, robust & hairy son of Hi Definition 58H. These Heavy Si 57Z daughters are worth their weight in gold in terms of completeness, outcross pedigree, and offering added hair, skeletal length and that 'wicked' hind leg Heavy Si is known for.

Exposed Jaymarandy The Lion 125J May 1- July 1, 2023. Exposed Kueber Hi Definition 58H July 1-August 15,2023.

Blackcap May 917G was acquired with our good friend Darcy Elliot (Elliot Bros Angus) as lead-off in the North Perth Angus Dispersal. She is sired by none other than the most dimensional member of the Charlo x 4136 sons, SAV President. Her Dam, SAV Blackcap May 273 was an exceptional donor female for North Perth displaying tremendous phenotype and production for the Webers. 917G is a tanky massive cow with a stout hind leg and abound sweeping rib. She closely patterns her sister Siebring Blackcap May 473 (pictured) and her udder quality is typical of what you would expect from the famed Blackcap May family- defined by 4 evenly spaced, small teats, balanced quarters, and a smooth foreudder attachment that blends nicely into her barrel. The first daughter of 917G, DDD Blackcap May 22J (Lot 57) is a beautiful angular female displaying a great udder and a docile temperament. Due to us sharing possession over Blackcap May 917G, she was flushed early and successfully to Poss Deadwood and DMM Maximus 917G which have pregnancies and embryos selling in this sale. Her Deadwood calf Lockwood 54L is a growthy, long spined moderate BW calf that offers a unique, growth oriented pedigree to breeders seeking a unique outcross pedigree to Canada.

Exposed Jaymarandy The Lion 125J April 24 - July 1st. Exposed Kueber Hi Definition 58H - July 1 - August 15, 2023.

243F is a personal favourite and definitely should be marked as one of the 'sleeper' options in the sale. When you lay eyes on her it is no surprise her pedigree boasts some of the best breeding bulls of the mid-late 90's including Vermillion Dateline, Leachman Right Time, and O G L Battle Cry- not to mention Freewheeler 286S and Cash 665P on the dam side. Queen 243F was acquired from Remitall Farms as a heifer calf out of their bull sale and was selected due to her big barrelled, tanky, cowy look demonstrating robust bone and a square, wide-based design. Her elite sire, Rachis 21H still boasts a +121 YW EPD and was a mainstay in the Remitall program for many years and holds great relevance as a breeding piece to this day exhibited by this cow and his influence through the SMW Gustov bull walking at the famed Miller Wilson Angus. 243F's first calf was one of our feature bulls through the Langco/Kueber sale selling to Lazy HE Ranch (the Almberts) and her square made, hairy, wide topped heifer calf at side by Hi Definition 58H is likely to follow in her footsteps. If you like big, tanky, robust cows with beautiful udders, 243F would make a great addition. Sells with the complimentary mating to The Lion 125J.

We selected this phenotypically stunning bull in the spring of 2023 as the high seller out of the Jaymarandy Bull sale to add his unique blend of sensible performance, maternal potency and structural integrity in a perfect footed, long-spined package. We wanted to support a smaller angus breeder whose program we admired from not just a phenotype but production standpoint... a program where we knew our invested dollars would go a long ways towards the purchase of a impactful breeding piece. Phenotypically, The Lion is excellent- with his ideal head and skull shape tying into an upright but masculine neck offering an elongated skeleton- standing square on all four corners. He possesses an expressive lower quarter, remains smooth hearted and offers moderate birthweights and efficient frame size. Judge Brett Wildman verified our thoughts on The Lion 125J when he selected him as Champion Junior Yearling Bull at the 2022 Canadian Western Agribition. Maternally, The Lion 125J is elite- coming directly from the Grace 640D donor who not only exhibits ideal udder quality but remains sound structured and built for the long haul. Grace 640D is proving her potency and heritability in her production as noted by herd sire Jaymarandy Lights N' Sirens 911G and True North 902G in addition to The Lion 125J. Genetically, The Lion is a unique "made in Canada" solution that culminates some of the top bloodlines and programs available. The Lion 125J recently claimed Senior Champion bull at Brandon AgEx, while a son of The Lion claimed spring bull calf champion- a testament to his first calf crop. The Lion will be at CWA 23' where the production of the Jaymarandy/Youngdale renown Grace family will be evident. The Lion 125J sells in his entirety, however Jaymarandy Livestock has tentatively entered him in NWSS 2024 (Denver) and has a spot in herd bull alley in the event that the new owner would like to pursue this marketing opportunity.

Hi Definition 58H is a rugged and masculine standout of the 'landmark' flush of Youngdale Hi Definition 185B and MWC Rosebud 32Y. Hi Definition 185B produced one of the strongest pens of bulls that spring we decided to use him; they were noted for their consistent width of top, expressive muscle pattern, sound structure, good scrotals, YW performance, and hair. 185B turned out to be a great choice as all of the resulting progeny from this venture has been nothing short of standout. The ability of these two breeding pieces to replicate quality of both sexes is unique and a testament to the heritability and productivity of these genetics. Rosebud 2H, 4H, 6H, and 32H (owned by Gracedale) are all donor quality or donor candidates in their own right and the maternal merits of these genetics is undoubtable after analyzing these flushmates in production. Hi Definition 58H is a wide-based herd sire that stands proud and square on a good set of feet & legs. He is extremely capacious and dimensional- yet remains nice shouldered, strong hearted and athletic on the move. If you follow the bonoma principles, you will notice this bulls ideal reverse wedge shape at maturity complimented by wirey coarse hair on his crest. Hi Definition 58H has produced an undeniably good set of calves when you analyze what is in this sale in the heifer calf and bull calf sections. They replicate his type and kind being sound from the ground up, having ample rib shape, depth of body, width of top and moderate birthweights. Hi Definition 58H consistently stamps his calves with nice heads, good structure, wide tops and elongated skeletons. Hi Definition 58H is a 'no holes' bull whose status as an elite herd sire is without question considering his consistent production abilities on a diverse set of pedigrees.

Dominator 57J is a standout herd bull unique to the red studbook in terms of his look, phenotype, width of pins and overall combination of correct structure and actual WW and YW performance. He is a massive scrotalled bull (41 cm yearling) and was one of our stoutest, heaviest, and hairiest calves at weaning in the fall of 2021. Maternally, he comes from a very productive cow family being a maternal brother to previous herd sire Shotgun Willie 54E, as well as Powerplay 61H (by PTO at Elliot Bros), and Stronghold 67K (by L83 2-Strong). His maternal sisters in this sale, Fat Amy 5F and Fat Amy 53C are wedge shaped, nicely constructed cows displaying excellent udder quality and production capabilities. His sire, U2 Dominion, was a sale feature of Ungers a number of years ago selling to ST Genetics and Cheramie Viator in TX and has propelled himself as one of their “go to” power sires for thick, wide topped, and big barrelled sale bulls. Our biggest regret is not using Dominator 57J more in his yearling

year- but the calves he does have on offer such as Lakima 146L, Superior 117L and Bayberry 022L replicate his same width of pins, structural integrity, up-headed and attractive phenotype. Dominator 57J is a square-tailed rendition of his breed-leading sire Dominion and backed by the matron responsible for the Fat Amy cow family.

Exposed Red Kueber Juggernaut 58K April 15 - May 3, 2023. Exposed Red Kueber Dominator 57J May 3 - July 1, 2023. Ultrasounded 35 days on June 1.

A phenotypically stunning, huge bared, square hipped, nice uddered and productive young cow sired by Goodfella 341Z. Her Dam, NLT 53Y was a Crimson Jewel daughter selected out of the great Canadian Red Round Up sale and she is the matron responsible for all the "Fat Amy's" in this sale as well as the big-time herd bull Dominator 57J. Maternally, Fat Amy 5F comes from a very productive cow family being a brother to previous herd sire Shotgun Willie 54E, as well as Powerplay 61H (by PTO at Elliot Bros), and Stronghold 67K (by L83 2-Strong). Her maternal sister in this sale, Fat Amy 53C replicates her quality as a wedge shaped, nicely constructed cows displaying excellent udder quality. Her calf at side, Fat Amy 58L is a carbon copy replica of 5F, but being sired by the Franchise son Enterprise. If we were more actively involved on the show circuit- she would be the one. Fat Amy 5F sells bred to the dark footed, rugged & hairy Juggernaut son 58K who adds Bayberry 1Z and the great Meg cow family.

A moderate framed, but soft bellied, feminine, and nicely constructed daughter of the Big League 544R bull. Big league females were a feature in the historic U2 dispersal and are renowned for their quality and production capabilities. Fat Amy 253J knocked it out of the park with her 2023 heifer calf at side by Dominion 64J- a bull who is an ET from Dominion and our Creamsoda 341B donor listed as lot 71. 253J came in a bit on the greener side due to the massive heifer calf she had at side- but be sure to evaluate her at sale time. Here is a productive young female that did a heck of a job on her first calf. Bred back to the timeless and sought after Reckoning 149A.

Exposed Red Kueber Dominator 57J May 3 - August 1, 2023. Observed May 12.

Favorite 94B - aptly named and recognizable across the pasture- this stout made, deep ribbed, angular, feminine donor prospect was purchased through Blair's Genetic Focus sale a number of years back and she is a direct daughter of the beautiful Crush 59R donor; Southland Favorite 88T who was sold to Rusts in North Dakota. Favorite 94B is a free moving individual who is sound to the ground where she stands on a solid dark foot. Her udder is ideal being neat and tidy characterized by small evenly placed teats. From a production standpoint, Favourite 94B has been stellar producer and a fertile cow. Sons Gunsmoke 81H (Shotgun Willie), Reckless 70G (Reckoning) and Strongbow 59K (2-Strong) were top of their contemporary groups on the red side and sold through our annual bull sale. Her Daughter, Favorite 47G is a tanky cow with sweeping rib shape and thickness. Her calf at side, Locksmith 57L is a standout bull calf admired for how thick ended he is; wide-pinned, massive topped and rugged/masculine in his design. Locksmith 57L is a definite herd sire candidate offering immense potential with his phenotype, performance and outcross pedigree culminating Enterprise, Duff New Attraction and female producer Crush 59R.

Exposed Red Kueber Dominion 57J May 2-June 5, 2023. Observed May 23.

An exceptional daughter of our Hotwheels Herd sire and Favourite 94B. She is an exceptionally wide topped, huge barreled, tanky cow. Hot Wheels was an exceptional Real Deal 01W son we walked and subsequently drew semen on. She is big barreled, stout and hairy just like him- with the added hind leg and up headed phenotype from Favorite 94B. 47G was another example of one of the quality cows that were just at the wrong place at the wrong time on sync day 3 years in a row. Bred back to Dominator 57J is an exciting one adding the Fat Amy cow family and the attractive phenotype, hip and hind leg from Dominator.

Exposed Red Kueber Dominator 57J May 3 - July 1, 2023

Creamsoda 341B is a phenotypic standout straight from the heart of the renown Northline Angus program. We are very familiar with 'Creamsoda' genetics as 341B is a full sister to the dam of one of the greatest walking red sires we've used, Goodfella 341Z. The Creamsodas have been a staple at Northline and continue to prove their relevance by producing both sexes as evident by the production of successful show cattle; Goodfella 341Z, Crusher 141Y, Money 341A, and Chaos 001F. The Creamsoda genetics are unparalleled for their maternal merits in terms of udder design, structural integrity and fertility. 341B is a square-made, phenotypic stand out with captivating angularity and a youthful, yet broody look. Her daughters by U2 Dominion have turned into fantastic young cows with incredible dimension while remaining free moving and feminine looking. Imagine the possibilities bred back to the dark red, long-spined, big scrotalled, eye appealing performance sire Dominator 57J.

Exposed Red Kueber Juggernaut 58K April 21-May 2, 2023. Observed April 21 (safe). Ultrasounded 40 days on June 1.

Lakima 146D descends from the purchase of Lakima 46X at the Glesbar dispersal. Lakima 46X remained working here until just recently proving the fertility and longevity of this cow family. Lakima 146D is an extremely deep bodied, nice uddered, angular female by the RBC Supreme champion Longitude 646Y. Her production has been stellar with several big rugged bull calves selling through our bull sale and her productive daughter Lakima 10F who produced Lakima 10H which ended up at Walter Cattle Company in OK for \$22,000 USD through the Northline Reds sale. Her calf at side, 146L is a performance oriented female who is an incredibly wide-pinned, hairy and dimensional daughter of Dominator 57J. Lakima 146D sells bred to the loose hided, rugged, cherry red Juggernaut son 58K who adds the influence of Bayberry 1Z and the renowned Meg cow family to the equation.

Observed Red Kueber Juggernaut 58K on May 1, 2023 (safe). Exposed Red Kueber Juggernaut 58K April 15- May 2, 2023. Exposed Kueber Dominator 57J May 3- July 1. Ultrasounded 30 days on June 1.

Lakima 10F sired by our best walking red herd sire to date: Goodfella 341Z. 10F's first calf, Lakima 10H sold as a high seller in the Northline Reds Southern sale to Walter Cattle Company of OK. Her son, Dominion 84J was a feature bull in our 2022 bull sale selling to Springhill Cattle Co (Riley Blake), and her son at side, Landrover 64L offers immense herd sire potential being one of the first L83 2-Strong sons to sell in Canada. Landrover 64L is a thick ended, big ribbed herd bull prospect with an abundance of muscle expression through his stifle and into his loin.

Exposed Red Kueber Dominion 57J May 2-June 5, 2023.

Faith 12F is the result of an embryo package purchased out of the renowned Red Round Up sale. We originally selected these genetics not only because Faith 5X was a beautiful uddered, correct and productive cow that appeared to replicate her qualities- but also because the Rob Roy 122K females are some of the best red females we've seen in existence to this day. Faith 12F is a direct daughter of Y3 Bar Faith 5X who was a picture perfect brood cow and also was successful in the show ring for Vikses as denoted by her winning the red show at farmfair in 2014. Faith 12J is a dark red, good footed, stout, moderate cow with an ideal udder defined by 4 evenly spaced small teats and strong fore and rear attachments. Lucic 51L, the tremendous, hairy, deep sided future herd bull at her side- was admired by many in late August at the Northern AB Angus club tour. Typical of our red program; he is a nicely constructed, soft-middled, easy doing bull with a masculine crest and a correct set of feet and legs. To our knowledge, these Enterprise calves are the first to sell in Canada, and Lucic 51L presents a great opportunity to get in on the ground floor of a low-birthweight future herd sire offering a unique genetic twist being sired by Enterprise and backed by SSS Soldier 365W and the maternal traits of Rob Roy 122K.

Exposed Red Kueber Dominator 57J May 3 - July 1, 2023. Exposed Kueber Hi Definition 58H July 1-August 15. Ultrasounded 40 days June 1.

The Lassie Family was acquired when we purchased Leonard Tuftys entire embryo inventory a few years ago. Lassie 166X has 24 progeny registered with CAA and was an elite matron working for the respectable Allison Farms program. 166X herself was a daughter of Alliance 22U who was known for producing long spined, nicely made, maternal looking females and backed by one of the most influential red angus sires in Canada, red YY Knight 640F. The three young daughters from Lassie 166X here are nicely constructed females who have a fresh feminine appearance and ideal udders. The two lactating daughters had excellent milking ability and put a lot into their calves, thus were on the greener side in appearance on picture day. The three Lassies on offer here are sired by the \$74,000 Red U2 Renown 193C who Known for his structural soundness, foot quality, muscle and overall dimension in moderate framed package.

Exposed Red Kueber Juggernaut 58K April 15 - June 5, 2023. Observed April 17 (safe). Ultrasounded 45 days June 1.

The Superior family began with a 'trade' between us and our good friends at HR Hahn Cattle Co. HRH Superior 70C was a feminine and angular Kingman daughter we selected from Bob & Ryan. Superior 70C traces back to Superior 4H who was a donor back in her day selling through red round up and being a cornerstone red female for Dwajo and Soo Line. Superior 170E- the matriarch of our Superior tribe is an incredibly stout made, hairy, wedge shaped female with a beautiful udder typical of the Shotgun Willies. Superior 170E continually passes on her big hip, expressive lower quarter, hairy, soft belly and loose hided type as denoted by her reference progeny Power Ranger 62H and Firebrand 79K (pictured). The Superiors have remained a solid footed and productive family for us proving their production capabilities on a variety of sires. She sells bred early to the value-added, rugged stud Juggernaut 58K.

7K is a full sister and flush mate to Juggernaut 58K who we used as a walking herd sire prior to his new home delivery this spring. We thought so much of Juggernaut 58K you will see many of our top red females are featuring services to this complete and value adding sire. 7K is designed much like her flushmate in terms of her robust design, capacity, yet elegant and athletic way of moving. Both of these flushmates are dark footed, have exceptional hair, and are backed by the Bayberry 1Z donor who was not only successful in the show ring, but went on to be a consistent and productive progenitor. 7K culminates some of the breeds leading cow families; Bayberry and Meg through the strategic use of the rugged performance sire Juggernaut.

Here is an exceptionally long lined, spring born female that we think could have very competitive in the spring calf divisions if we were on the show road. 022L is a flawless, free-moving, angular, attractive female from our headlining red herd sire Dominator 57J. This combination of Dominator and Bayberry should amplify performance and structural correctness within the red angus breed while increasing milk production and yearling performance contributed by the Fat Amy line on the paternal side.

Kueber Erelite 240G - daughter of Shotgun Willie 54E

AI'd Red 9 Mile Enterprise on April 10, 2023 (Safe). Exposed Kueber Definition 50K April 15 - August 15, 2023. Ultrasounded 50 days on June 1.

Elora 900T was a highlight selling through red round up back in her day and herself is a producing machine with several offspring and decedents selling on both sides of the border, most notably her daughter DTA Elora 10W by Terron Tahoe selling to Wildcat Creek in KS a number of years back. The Elora's were a staple cow family for Jackson Cattle Co (JCC) and subsequently Soo Line. Here is a unique twist to the pedigree being out of our stout, incredibly hairy Shotgun Willie 54E herd sire who is proving to produce amazing females. 900K is an exceptionally complete, wedge shaped female that like her mother, displays a tremendous amount of rib shape, capacity and moves in a fault-free, balanced manner. The udder quality and milk production on the Eloras and the Fat Amys (who back Shotgun) is sure to reinforce this females ability to be a herd bull factory. She sells bred early to Enterprise. Full sibling embryos sell in the frozen genetics section. Sells bred early to the incredible phenotype Franchise son, Enterprise.

Exposed Kueber Definition 50K April 15 - August 15, 2023

Two full sisters by Goldmaster & Kassie who are extremely long-spined and attractive on the side profile. Kassie herself showed great longevity producing well into her teens, most notably Northline Revival who was successful south of the border, and Young Kassie who was at her side when they won Gr. Ch Female in Edmonton. These two full sisters are starting to spring and set down a nice udder. They are large framed, long-spined, nice hearted and appear to be good footed. Both full sisters sell bred the same way- to the value adding service to Definition 50K. Imagine the possibilities when infusing Hi Def and Rosebud into the red gene pool.

Kueber Definition 50K service sire to lot 89
